

# github\_code\_push

Successfully pushed the PostureGuard Pro e-commerce website code to GitHub repository. The project includes all recent bug fixes:

1. **Pricing Fix:** Corrected homepage banner price from 29.99to 39.99
2. **Navigation Fix:** Fixed header navigation links to work properly from product pages using React Router hash-based navigation
3. **Git Repository Setup:** Initialized git repository, configured user credentials, and pushed all 17,075 project files to the remote GitHub repository at <https://github.com/JFKOLLIE/postureguardpro.git>

The codebase is now version controlled and accessible on GitHub with the main branch properly set up for future development.
